IDENTIFIERS	Full Time Equivalent Students; *Washington

ABSTRACT

The enrollment forecast is prepared each year to provide a consolidated data source for those concerned with higher education in the State of Washington. The 1977-79 biennial forecast is made for each public four-year institution, using actual fall 1976 data. Analyses show that previous enrollment growth is ending, and that stabilization or decline in enrollment is in store. Headcount enrollments are increasing faster than full-time equivalent enrollments. These trends can be attributed to declining high school entrances, declining rate of succession from high school to college, and declining transfers from community colleges. Similarly, the percentage of veterans in the public state colleges and universities is declining. Data are arranged in tabular form, showing comparison of budget forecasts for the past years, annual average student credit hours by cost and course level for each institution, quaterly variation of credit hours (excluding summer) by course level for each institution, quarterly variation of cumulative percent of students by credit-hour intervals for each institution, annual average headcounts, summer school enrollments, community college enrollments according to demographic and institutional characteristics, and private college fall enrollments by institution. PREFACE

The Higher Education Enrollment Forecast is prepared and published each year by the Population Studies Division of the Office of Program Planning and Fiscal Management to provide a consolidated Data Source for those concerned with and interested in Higher Education in the State of Washington. This year's publication has the 1977-79 Biennial enrollment forecasts for each of the public four year institutions using actual Fall 1976 data. New historical data series were added this year to those included in last year's publication to provide those users of this publication with more information about Higher Education Enrollment trends.

For those of you who utilize this publication, during the coming year, please feel free to comment on the format or content so that we may strengthen the publication in the future.

Special thanks are due to the Registrars and Institutional Studies people from each of the public four year institutions who provided us data and assistance. Further acknowledgements to:

Dr. Ross Armstrong, Washington State University
Mr. Les Eldridge, The Evergreen State College
Mr. Earl Hale, State Board for Community College Education
Mr. Don Manson, Eastern Washington State College
Mr. Gene Omey, Western Washington State College
Dr. John Purcell, Central Washington State College
Mr. Robert Thompson, University of Washington

1976 HIGHLIGHTS

...Higher Education has in the past experienced a large enrollment growth and it now appears that this trend will end. In its place Higher Education will have a period of stable or declining enrollments. In a three year period, enrollment for the public state colleges and universities grew from 57,836 in Fall 1967 to 67,791 in Fall 1969, an increase of 9,955 students. This enrollment growth has slowed somewhat since then. In the following seven years from Fall 1969 to Fall 1976 enrollment increased by 10,609 students. In the last three years, from Fall 1974 to Fall 1976 the growth in enrollments slowed to 3,881 students. From Fall 1975 to Fall 1976 enrollment grew by only 218 students.

Headcount enrollments have been increasing faster than the number of Full Time Equivalent students. In a five year period from 1971-72 to 1975-76 annual average headcount enrollment increased by 6,088 students while Full Time Equivalent students grew by only 2,678. The annual average student credit hours for the public four year colleges and universities was 14.16 in 1971-72 and declined to 13.32 average credit hours per student by 1975-76. This trend of students carrying lower credit hour loads appears to be continuing. In Fall 1975 the average credit hour load for all students enrolled in public four year colleges and universities was 13.45 and this Fall 1976 the average credit hour load declined still further to 13.30.

This trend towards a stable enrollment can be understood by examining the high school entrances and community college transfers to public four year colleges and universities. Total high school entrances in Fall of 1971 was 10,031 students and by Fall 1976 this had dropped to 8,202 entering students. At the same time, the succession rate of high school graduates entering the public four year colleges has been decreasing from the Fall 1971 rate of .1971 to the Fall 1976 rate of .1608. Transfers from the community colleges to the public state colleges and universities have fluctuated from year to year but the declining trend can still be seen from Fall 1972. In that year transfers were 5,016, by Fall 1976 that was down to 4,549 transfers.

Also showing a declining trend was the percentage of veterans in the public state colleges and universities. In both the Fall and annual average analysis this downward trend has remained the same. In 1972-73 15.15 percent of students were veterans and by 1975-76 11.43 percent of students were veterans. This represents a decline of 3.72 percent of veterans in a four year period.

...UNIVERSITY OF WASHINGTON: The annual average enrollment increased by 522 students from 1974-75 to 1975-76. However, enrollment declined 157 students from Fall 1975 to Fall 1976. The average credit nour load in Fall 1975 was 12.88 and in Fall 1976 this decreased to 12.76. Community college transfers dropped by 193 students from Fall 1975 to Fall 1976. Freshman enrollment will be held constant at 4,200 students and annual average enrollment will remain at 33,500 through the 1977-79 Biennium.

...WASHINGTON STATE UNIVERSITY: The annual average enrollment increased by 586 students from 1974-75 to 1975-76. Fall enrollment in 1976 had increased further by 509 students over Fall 1975, the largest fall enrollment increase by any of the public state colleges and universities. The average credit hour load for Fall 1976 remained stable at 14.50, down only slightly from the Fall 1975 number of 14.57. Community college transfers were up by 45 from the Fall 1975 figure of 727 transfers. Entrances from high school declined by 301 students from Fall 1975 to Fall 1976.

...CENTRAL WASHINGTON STATE COLLEGE: The annual average headcount grew by 919 students from 1974-75 to 1975-76. This growth pattern slowed to an increase of 102 students from Fall 1975 to Fall 1976. Central Washington State College, in the past three years, has had a larger annual average headcount than fall headcount. The percentage that annual average headcount is of fall headcount was 105.8% in 1975-76. The average credit hour load declined from 12.23 in Fall 1975 to 11.77 in Fall 1976. Community college transfers were stable, down only 4 from Fall 1975. High school entrances were up 24 from the Fall 1975 total of 693.

...EASTERN WASHINGTON STATE COLLEGE: The annual average enrollment grew by only 38 students from 1974-75 to 1975-76. Fall 1976 enrollment dropped by 290 students, the largest Fall 1976 decline of any of the public state colleges and universities. The average credit hour load declined from 13.89 in Fall 1975 to 13.69 in Fall 1976. The community college transfers increased by 46 from the Fall 1975 number of 486 transfers to Fall 1976. High school entrances dropped 147 from Fall 1975 to Fall 1976.

...THE EVERGREEN STATE COLLEGE: The annual average enrollment increased 81 students from 1974-75 to 1975-76. Fall 1976 enrollment had 129 students more than Fall 1975 enrollment. The part-time student enrollment for Evergreen in Fall 1976 increased 295 students over what it had been in Fall 1975 to 492 students. The average credit hour load in the Fall of 1975 was 15.10; by the Fall of 1976 this had fallen to 14.20. Community college transfers increased by 61 students from Fall 1975 to Fall 1976. High school entrances declined from 94 in Fall 1975 to 79 in Fall 1976.

...WESTERN WASHINGTON STATE COLLEGE: The annual average enrollment climbed by 623 students from 1974-75 to 1975-76. Fall 1976 enrollment was down 75 students from Fall 1975. The average credit hour load in the Fall of 1975 was 13.86, by the Fall of 1976 this had increased to 13.93. The number of community college transfers was constant, with a loss of only 10 students from Fall 1975 to Fall 1976. The number of high school graduates entering Western was up 15.23% in Fall 1976 over Fall 1975, from 1,070 to 1,233.

...WASHINGTON COMMUNITY COLLEGES: Academic growth which is not related to growth in vocational programs will be held constant during the 1977-79 Biennium. The total Full Time Equivalent enrollment for community colleges grew 7,284 FTE's from 1974-75 to 1975-76. The academic Full Time Equivalent students rose 2,940 while the vocational FTE's increased 4,344 from 1974-75 to 1975-76.

COMMUNITY COLLEGE ENROLLMENT PROJECTIONS

ASSUMPTIONS

1. *Assumptions were made concerning participation rates for the four age groups (18-20, 21-24, 25-29, 30+) that comprise the Community College Student Population.*

The initial projections for the 1977-79 Biennium were developed in the Fall of 1974, with provision for a review and update in the Fall of 1976. The annual growth provided in those projections was developed on the basis of analysis of the state's population projections by age category, the age group participation rate experience of the community college system, and the major factors expected to bear on community college enrollments. The primary assumptions were:

a. Very slow growth of the participation rate of the 18-20 year-old category. This, combined with very slow population increases in this category, provided very little enrollment growth for the 18-20 age group. This assumption appears reasonable in light of alternative sources of educational services and the changing age profile of the population.

b. The historical rate of growth of participation rates for both the 21-24 age group and the 25-29 age group was assumed to slow. The continuation of the historically high growth rates in these age groups does not appear reasonable due to the decreasing impact of the G. I. Bill and the assumed moderation of the level of unemployment.

c. The historical growth rate of participation for the 30+ age group was also slowed on the assumption that the high rates recently experienced will moderate.

2. *Community College District enrollment planning established the initial program composition of the projections.*

The original 1977-79 projections referred to in paragraph #1 above provided the system control totals that were used by the Districts in developing 1977-79 enrollment plans during Winter and Spring of 1976. These individual district plans reflected an accommodation between the limitation of the control totals, the demand for services of the local communities, and the program and facility plans of the colleges. The timing and nature of the planned growth was developed through the planning process. A princip result of the planning was the indication that a majority of the growth was

scheduled for vocational programs--both in the job entry area and in the skill upgrading and retraining areas.

3. *The original series was adjusted to reflect 1976-77 enrollment levels.*

A review of the Fall 1976 enrollments indicates that the factors responsible for the extraordinary jump in 1975-76 enrollments have run their course or are substantially diminished, and the 1976-77 enrollments will not reach the levels forecast in the initial projections. While 1976-77 enrollment is still expected to exceed the budgeted enrollment figure by 5,566 FTE students, the total for the year is expected to be below the earlier estimate from which the growth for the 1977-79 Biennium began. Accordingly, the State Board requested that the original series be adjusted to reflect the revised 1976-77 base level.

The factors that are no longer inordinately influencing enrollment demands are:

a. The increase of veteran enrollments in the 1974-76 period was reversed, and the level of veteran enrollments are expected to decline slowly during the next two years. This reversal of the recent trend was brought about primarily by the establishment of a "delimitation" policy by the federal government beginning June 1, 1976. This policy provides for a loss of veterans benefit eligibility ten years after discharge. This will steadily reduce the pool of potential veteran enrollments and is causing a substantial one-time impact in 1976-77 due to the June 1 beginning of the new policy.

b. Demand for Community College enrollments varies in direct relationship to the level of unemployment. As job opportunities are reduced, the demand for college training increases. This partially accounted for the substantial growth in the 1974-76 period. Recently, as job prospects have brightened somewhat, this demand has returned to a more normal pattern. A gradual reduction of the level of unemployment during the next 24 months should reduce the level of demand experienced during the last two years.

4. *The 1977-79 projected growth was adjusted to reflect the estimated impact of course coding within the Community College System.*

The projected growth for 1977-79 was reduced by 500 FTE's per year to reflect the estimated impact of the course coding study that the Community College System is currently conducting and will implement beginning in the summer of 1977. One element of this study involves a course-by-course review of each District's offerings to determine a consistent and proper coding of Community Service courses. Such courses are offered on a self-supporting basis and are not reported as part of the Community College System's fulfillment of its

contract enrollment levels. The impact of the recoding of courses currently offered on a state-supported basis to a community service basis is estimated to be 500 FTE's each year.

5. *The 1977-79 projected growth was further limited by the elimination of the academic growth that was not related to vocational programming in 1977-79.*

This policy decision by OPP&FM limited the growth in the projections to only that which is of a vocational nature and the academic courses needed to support that vocational growth. This academic course work in 1975-76 represented 27 percent of the vocational FTE's. This 27 percent factor was used in adjusting downward and revising the academic/vocational mix of the growth originally established in the district enrollment plans. This policy is based on the assumption that in a time of scarce resources--and a contracting higher education enrollment pool--the budgeted enrollment projections should be limited to vocational and related expansion in 1977-79.

6. *The 1977-79 contract numbers have been adjusted in anticipation of the rolling 10th day counting methodology to be employed in 1977-79.*

The Community Colleges are currently (1975-77 Biennium) counting FTE enrollments in two ways--the nistorical method and the rolling 10th day method--in order to establish a relationship between the two. The factor used for the adjustment of the 1977-79 contract totals is based on the actual experience of the colleges in 1975-76. That rate is 1.88 percent.
